

ASSIGNMENT – 03

Vehicle Service Reports Suite Report Types Use Case

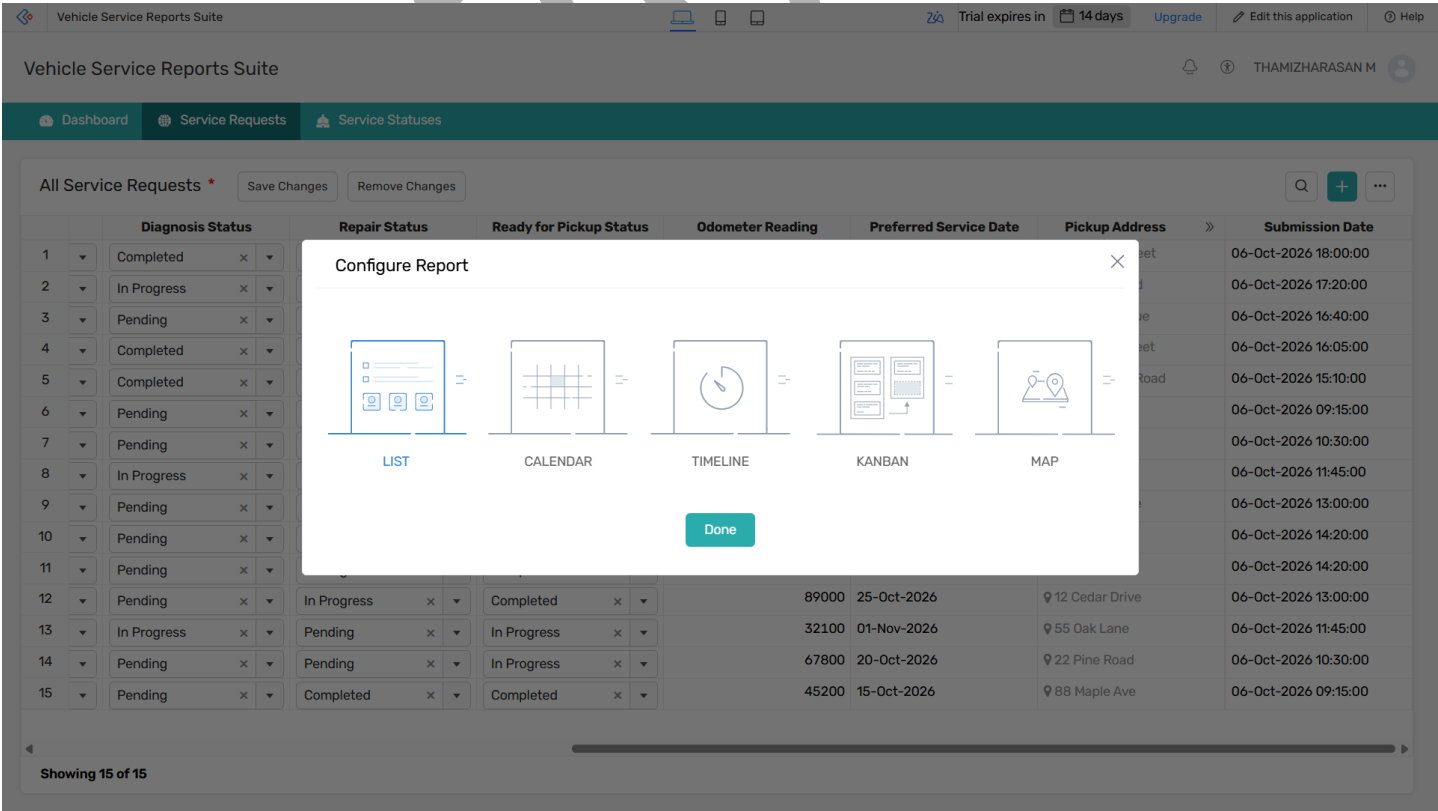

Objective:

To design and build a complete suite of Reports in Zoho Creator for the existing "Vehicle Service Request Form" application, demonstrating the correct usage of various Report Types (List View, Spreadsheet View, Kanban View, Calendar View, Map View, Timeline View, etc.) so that the service center staff can view, analyze, and act on service request data from multiple perspectives.

Procedure:

1. List View Configuration:

Create an "All_Service_Requests_List" to serve as the default landing report. Configure columns for Owner Name, Vehicle Registration Number, Vehicle Type, and Service Status. Ensure it provides a simple, scrollable list for quick browsing.

Showing 15 of 15

2. Spreadsheet View Setup:

Configure a "Service_Requests_Spreadsheet" to allow inline bulk edits. Group the records by Vehicle Type and allow the front office staff to easily update Diagnosis Status, Repair Status, and Ready for Pickup Status.

3. Kanban View Configuration:

Build a "Service_Status_Kanban" grouped by the Service Status field. This visual layout allows technicians to drag and drop service request cards between columns (e.g., Requested, In Diagnosis, In Repair, Delivered) to instantly update their status.

5. Timeline View Configuration:

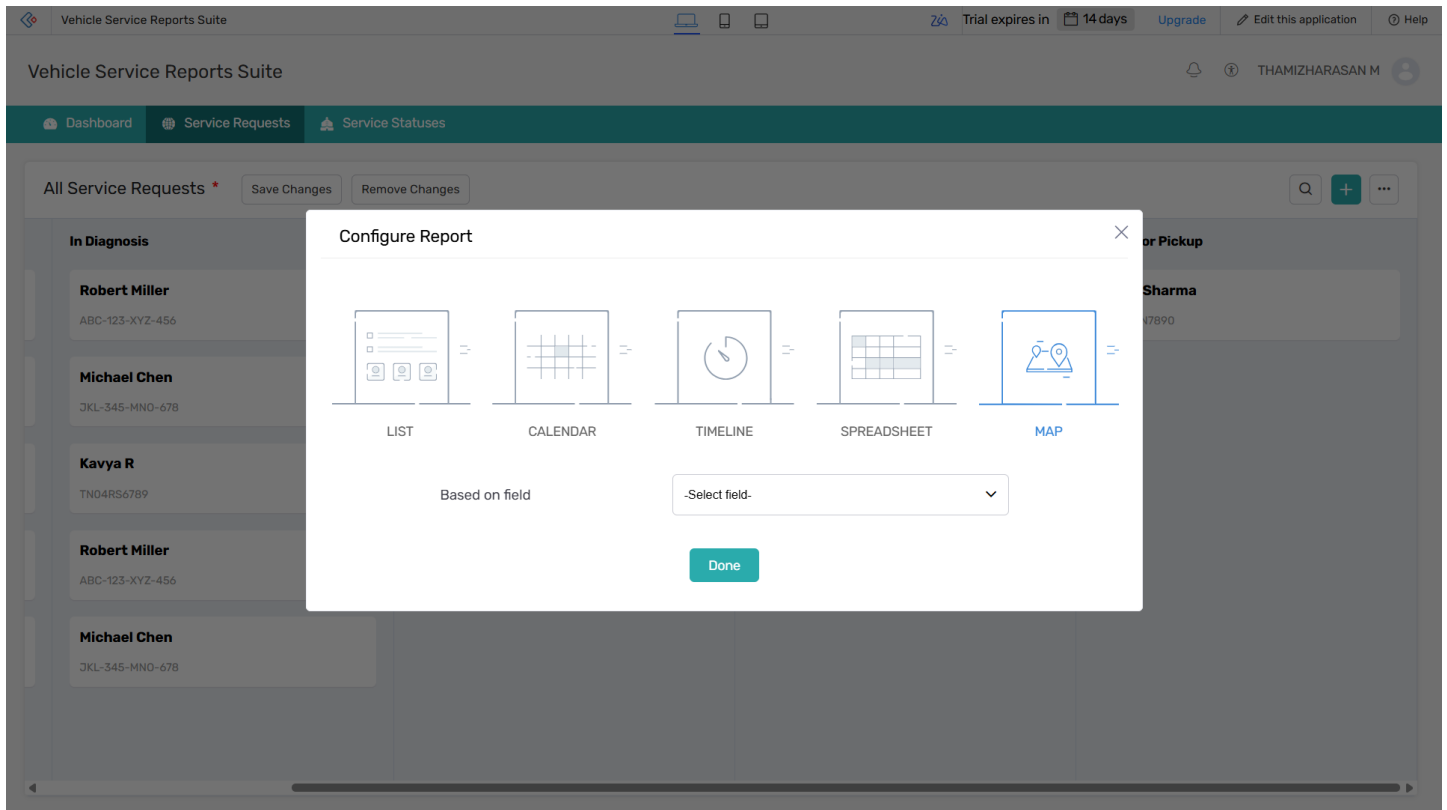

Create a "Service_Activity_Timeline" based on the Service Request Submitted On date. This helps the service center manager track cumulative service demand trends across weeks and months.

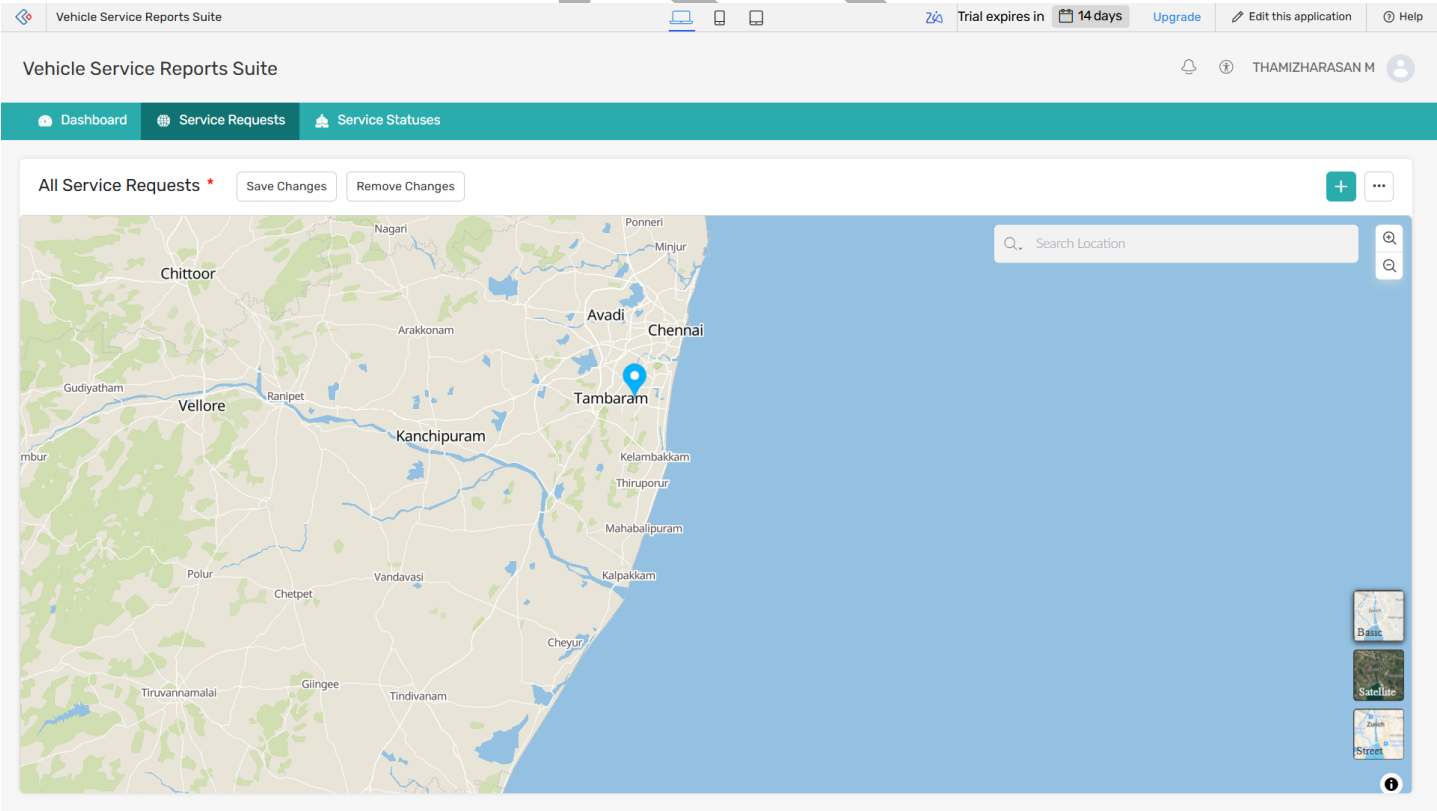

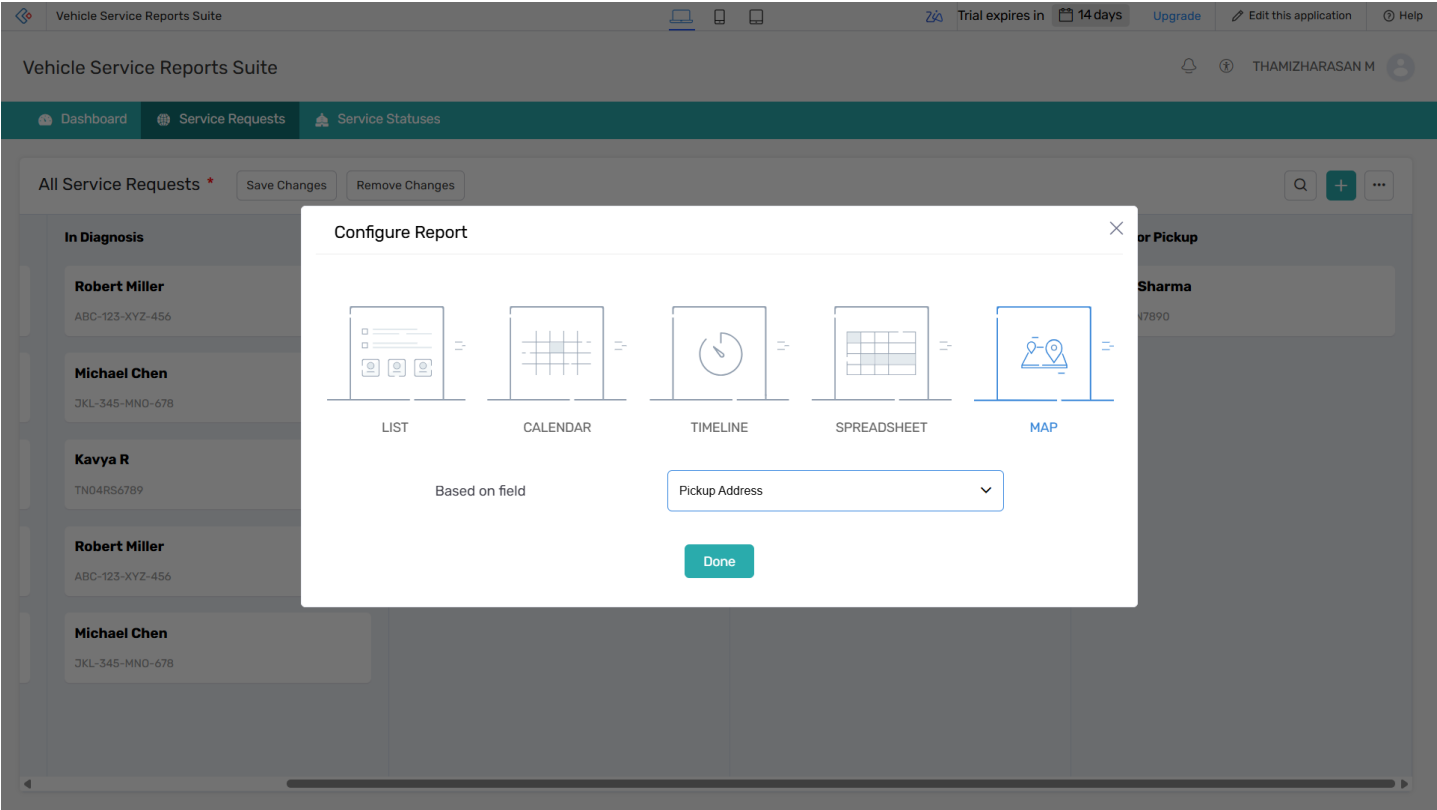

6. Map View Setup:

Configure an "Owner_Location_Map" based on the geocoded Pickup_Address field. This plots customer locations on a live map, aiding the pickup/drop team in planning efficient collection routes.
