EXPERIMENT -11

Approval Process

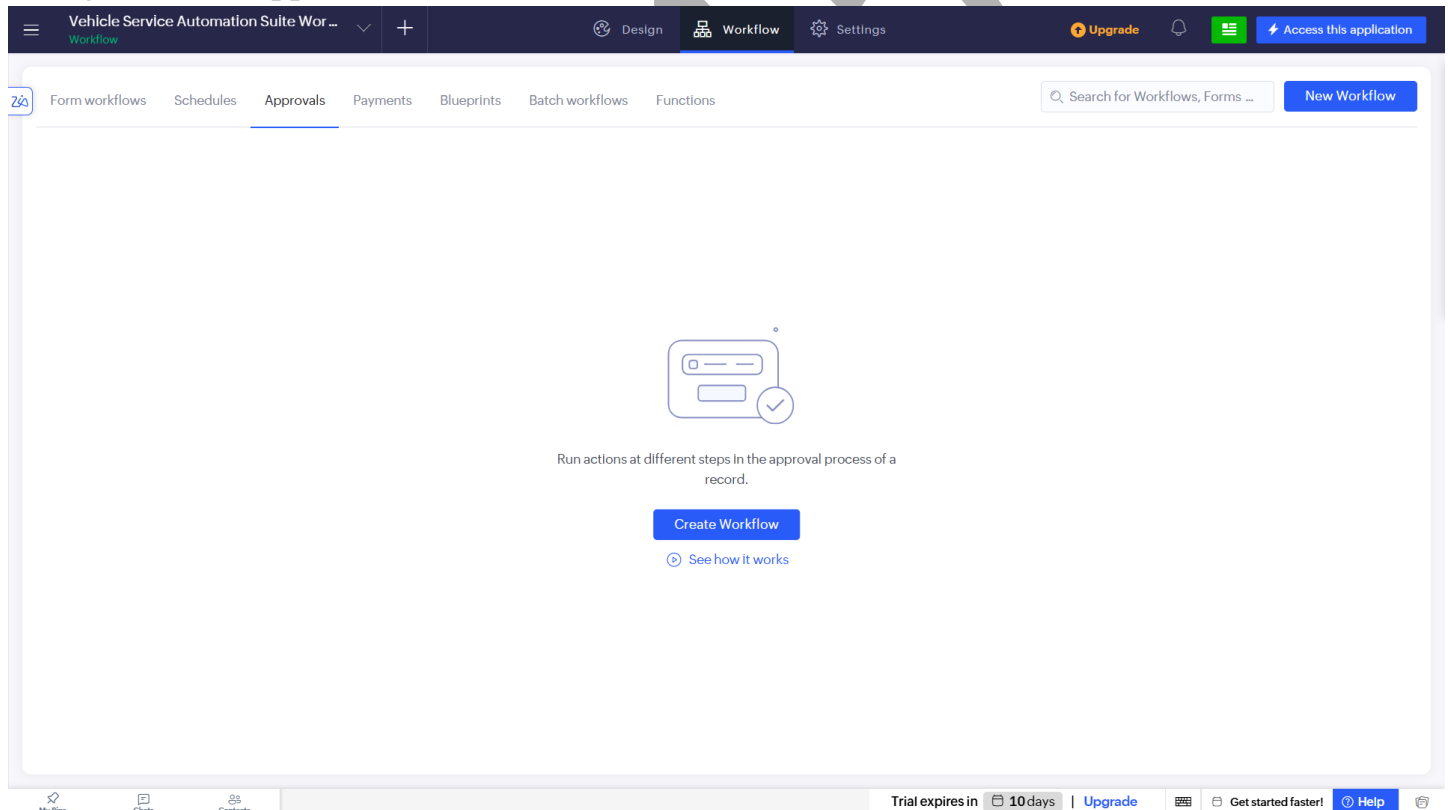

Application Name: Vehicle Service Management System

Aim

To design and configure an approval workflow process for high-cost service requests in the Vehicle Service Management System.

Procedure

1. Navigate to the Approvals tab under Workflow and click on "Create Workflow".

2. Set up the approval process to run on record addition for the "Service Request" form and name it HighCost_Repair_Approval.

Help

4. Add a new approver by selecting a specific user and setting the Approval label to "Approved" and Denial label to "Rejected".

5. Configure automated email notification actions to be sent to the submitter upon both "Approved" and "Rejected" outcomes.

Vehicle Service Automation Suite Workflow
HighCost_Repair_Approval

Below approvers at corresponding levels will approve the records added in the form [Service_Request](#)

6. Save the configuration and verify that the approval workflow is active and listed as "Enabled" in the Approvals dashboard.

The screenshot displays the 'Vehicle Service Automation Suite Workflow' dashboard. The top navigation bar includes 'Design', 'Workflow', and 'Settings' tabs, along with 'Upgrade', 'Access this application', and a search bar. The 'Approvals' tab is selected, showing a table of workflows. The table has columns for 'Workflow Name', 'Details', 'When', 'Status', and 'Created On'. A single workflow, 'HighCost_Repair_Approval', is listed with a status of 'Enabled' and a creation date of '10-Oct-2026'.

Workflow Name	Details	When	Status	Created On
Service Request				
HighCost_Repair_Approval	2 Actions	On review	Enabled	10-Oct-2026

Result

The conditional approval workflow for high-cost repairs was successfully created, configured with designated approvers and email notifications, and enabled within the Vehicle Service Management System.
